Experience

Full-stack Web Developer - Charles Taylor InsureTech 2021-2022

- Contribute to the development of new features using Razor Pages and .NET Framework with a monolithic architecture.
- Address and resolve errors detected by me and requested by clients to ensure optimal operation of the software.
- Make modifications to the SQL Server database by creating and maintaining stored procedures.
- Diagnose and troubleshoot project infrastructure using Kubernetes to ensure stability and scalability.
- Implement improvements to DevOps practices to facilitate continuous integration and continuous delivery (CI/CD).

Infrastructure Manager - K27 2022-2023

- Successfully migrate a project previously hosted on virtual machines to Azure App Services.
- Create and configure essential infrastructure resources to host all the various services of the project.
- Implement pipelines for each of the project services, thus simplifying continuous integration and continuous delivery (CI/CD).

Full-stack Web Developer - Toqui e-commerce 2022-2023

- Design and develop 5 APIs using microservices architecture with .NET Core 6, Entity Framework and MS SQL Server.
- Create the frontend using technologies such as React, Redux, React Router, Axios, Formik, Yup and Material UI.
- Design all database entities and their relationships.
- Use Azure DevOps to facilitate continuous integration and continuous delivery (CI/CD).
- Use the Azure portal for infrastructure resources such as: Kubernetes Services (AKS), Container Registry (ACI), Azure SQL Databases.

Web Developer - Openix IT Solutions 2023-Present

- Develop new features using technologies such as React, Redux, React Router, Formik, Yup, NestJS and TypeORM.
- Identify and resolve issues on both the backend and frontend effectively.
